# Yamin Mahmood

## Full stack developer

RANDOLPH, MA  
6175163442

- **Email:** [yamintawhid333@gmail.com](mailto:yamintawhid333@gmail.com)
- **LinkedIn:** <https://www.linkedin.com/in/yamin-mahmood/>
- **GitHub:** <https://github.com/yaminyt>
- **Portfolio:** <https://yamin-portfolio.netlify.app/>

## SKILLS

- **Programming Languages:** Python, Javascript, OOPs, DSA
- **Frontend Tools:** HTML, CSS, React JS, Redux, Bootstrap
- **Backend Tools:** SQL, MySQL, Django, RESTful APIs
- **Version Control System:** Git, GitHub

## PROJECTS

### HIVE TECH WEAR - *An e-commerce website*

- Monitored 5+ website performance, watched for traffic drops related to site usability problems rectified the issues reviewed the app and feature coding, and planned future website upgrades with the development team
- Attended 10+ meetings with decision-makers and introduced new developments to the project to ensure optimal web development
- Implemented back-end developers integrated 8+ UI components with APIs, and databases so anyone can gather and refine specifications and requirements based on technical requirements or UX design

### Hunger Captain - *Restaurant Website*

- Built 10+ Application Programming Interface (APIs) which is quite indispensable when it comes to working on different software
- Established 20+ front-end website architecture which includes designing interactive, all-device responsive web pages
- Acquainted with the current developments in the world of web development of 2 core areas of frontend and backend
- Learned about 20+ emerging concepts in full stack, and managed all the activities of project members regarding the same
- Structured the application by Redux & React as Frontend and 2+ Django tools as Backend

---

## Capstone Project: Clean Water and Sanitation Trivia Game

### *Interactive Educational Exhibit Design*

- Coded the entire prototype and integrated push buttons into the final design, enabling an interactive trivia game for middle and elementary school students.
- Wired and soldered push buttons for the project's electrical components, ensuring functionality under design constraints.
- Developed a cost-effective and safe solution using Sparkfun components and a custom wooden enclosure, focusing on engaging educational content.
- Presented the project at an expo, successfully meeting design objectives.

## EDUCATION

**Northeastern University, Boston** - *Bachelor of Engineering (Computer Engineering)*

SEPT 2022 - JUNE 2026

## RELEVANT COURSEWORK

- **Computing Fundamentals for Engineers (EECE 2140)**  
*Software Development and Algorithmic Problem-Solving*
- **Cornerstone of Engineering 1 (GE 1501)**  
Introduction to Engineering Design and Programming
- **Cornerstone of Engineering 2 (GE 1502)**  
Advanced Engineering Design and Ethical Problem-Solving

## CERTIFICATES

**TECH I.S** - *Full Stack web development*

FEB 2023 - AUG 2023

**CISCO NETWORKING ACADEMY** - *Python Essentials 1 & 2*

JULY 2024 - SEP 2024
